1. Petroleum research in Hungary is under the direction of the Eötvös Loránd Institute of Geophysics, which since July 1951, has been preparing a geophysical map of the country. As a result of its studies the institute has indicated a number of localities where petroleum may be found. This institute uses portable sets which systematically perform the stratigraphic borings.
2. A search for oil has been conducted in the following localities:
  - a. Balatonszentgyörgy, since September 1952.
  - b. Nagybajom, begun in July 1952, it was abandoned in the meantime.
  - c. Fertőszentmiklós, since June 1952.
  - d. Eszterháza (now called Fertőd), since May 1952.
  - e. Nagylenk,<sup>1</sup> since July 1952.
3. The most promising results have been obtained from the borings at Fertőszentmiklós and Fertőd.

1.   Comment. No such town in available gazetteers; however, it might be Nagycenk.
